UC-Wireless evident gurus in WiFi solutions at African Eduweek 2014

Press release issued by UC-Wireless
Johannesburg, 16 Jul 2014

VISIT OUR PRESS OFFICE

Quentin Daffarn demo.

UC-Wireless was a Gold Sponsor and exhibitor at the recent African Edu Week 2014 held at the Sandton Convention Centre on 10 and 11 July 2014. The event afforded UC-Wireless the opportunity to showcase its latest WiFi and wireless technology and to partner with Neotel in offering fast and reliable WiFi connectivity for VIP delegates and exhibitors, with Neotel providing the Internet bandwidth and UC-Wireless providing their high-density enterprise Ruckus WiFi solution.

UC-Wireless displayed its complete product range, solutions and service offerings of its business vertical within the education sector which was created as a result of the high demand for reliable enterprise WiFi to support the implementation of e-learning. The company boasts an extensive high success rate and track record of deploying WiFi networks and e-learning solutions in various schools and educational institutions.

With in-depth knowledge, skill and expertise alongside a true understanding of the business dynamics of schools, UC-Wireless further demonstrated what it can offer in value-added WiFi supported technology, which included the Breadbin Digital Content Library, DisplayNote Collaboration software, Exinda WAN Optimisation technology and EdUCation Station. Through offering a specific range of products and professional expertise, UC-Wireless is able to deliver a solution focused offering to the market as well as work with various partners within these markets, giving educators the freedom of choice and versatility.

Quentin Daffarn (MD) and the UC-Wireless team.

African EduWeek is the premier education exhibition in South Africa and the "must attend" event for all education professionals wanting to learn more about the latest classroom innovations, technologies and products, as well as gain practical skills to take home and implement directly into their institutions.

Michael Berger and Quenin daffarn (MD) interviewed.

EduWeek
Quentin Daffarn

The event brought thousands of people through the doors, many of whom were fascinated by what UC-Wireless had to offer. A very passionate and involved Quentin Daffarn, who is a professionally registered electrical engineer and the MD of the company, accompanied the UC-Wireless team at their stand and also held in-depth one-on-one meetings at the VIP lounge. Daffarn 's passion created a stir of interest amongst guests and media when he enthusiastically

explained the expertise behind their high-density WiFi offerings. He believes that the first critical step to any effective e-learning platform is the installation of a robust, reliable, fast and seamless enterprise-grade high-density WiFi solution. "It is a key foundational building block – if not the cornerstone," says Daffarn.

The exhibition ended on a high note as two lucky winners, Brenda Molathegi from the Gauteng Education Department and Wynand van der Merwe from Sapient SA won the prize giveaways, which were two Ruckus APs, with a combined value of R15 000.

UC-Wireless has been operating since 2002 and this Johannesburg based company, with a branch in Cape Town, specialises in the distribution of complete solutions of wireless integrated communication systems offering a selection of tools and solutions for anything wireless in an array of industry segments but specifically focusing on the high in demand Education sector while at the expo. The company operates not only throughout South Africa, but also in Africa and the Middle East offering solutions to other vertical markets such as healthcare, retail, warehousing, hospitality, mining, casino/gaming, production/ industrial and enterprise.

Quentin Daffarn (MD) interviewd by media.

The company clearly demonstrated they are the leaders in paving the way to current and all future wireless solutions. For more information go to <http://www.uc-wireless.com>.
